- Cleaned and structured 3-4 real-world style datasets independently using Excel Power Query, resolving missing values and duplicate records to improve data accuracy for analysis.
- Built multiple Power BI dashboards with KPI cards, regional visuals, and slicers, uncovering key data trends that supported faster, evidence-based decision-making.
- Reduced manual data preparation time across projects by applying Pivot Tables, Pivot Charts, Slicers instead of manual sorting and filtering.
- Trained hands-on in Excel, Power BI, Tableau, SQL, and Python, applying data cleaning and visualization techniques across independent projects.

Projects:

- **Retail Sales Data Analysis — Excel** Cleaned and structured sales datasets using Power Query. Built 5 Pivot Tables, 3 Pivot Charts, interactive Slicers, and KPI cards to surface sales trends and support decision-making.
